3	Development of a whole of school approach to supporting students with relational trauma	Tuesday, 9 August		Non-member: \$80 for series \$25 per session
4	Development of Resilience in students in the classroom	Tuesday, 18 October		

Overview:

Teachers are working with children each day who have experienced multi-layered complex and dynamic childhood trauma, loss, and disrupted attachments. Relational and developmental trauma and toxic stress impacts children's bodies, brains, relationships, behaviours, cognitions, and emotions. This presentation series relates to relational and developmental trauma and the impacts for teachers in the classroom when trying to engage children with dysregulated behaviours. The goals for this series are to better understand relational and developmental trauma, the impact of this in the classroom, and how teachers can help students impacted by trauma to develop their resilience.

About the presenter:

Simone is deeply passionate about supporting children with complex trauma and is currently engaged in her doctorate research investigating the barriers and enablers for mainstream classroom teachers to engage in professional development of trauma informed classroom pedagogy. She is a Special Education teacher who has taught in behaviour support, special education, and mainstream classrooms. Simone has had a varied career working with children and young people in residential facilities and in complex care settings as well as out-of-home care with foster and kinship carers. She has worked as a Team Leader, Program Coordinator, and Program Manager in child protection and is currently a State Project Manager with Act for Kids setting up a program for Individual Support packages.
